# Infrastructures

**INGEROSEC is engaged in infrastructure improvement for economic and industrial revitalization directly connected with people's life.**

## Road

In consideration of the local conditions, we execute all steps from conceptual design to construction supervision, in various environmental conditions, from urban and suburban to rural and mountainous areas.

## Procurement

We respond to various needs, covering use and maintenance of a broad range of infrastructure equipment, on the principle of adequate planning and fair bidding process.

## Bridge and Structures

We propose solutions, securing safety and durability of bridges and structures, in collaboration with the INGEROP Group, our technical partner in France.

## Technical Cooperation

In order for developing countries to maintain infrastructure, we foster their problem-solving skills and transfer technology for project planning, implementation and operation.

# Partners for Sustainability

## Sustainable Environment

We tackle various global environment and social issues surrounding people such as climate change, natural disasters, peace building and security.

Renewable Energy

Flood Control

Demining

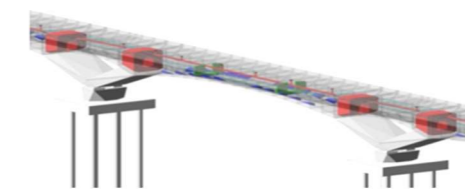

Fire fighting and paramedical treatments

## SDGs Business Support

INGEROSEC is supporting Japanese companies to expand into developing countries by making maximum use of the local network built through our past ODA projects. In order to disseminate excellent products and technologies of Japanese companies, we provide comprehensive support for business plan formulation, research, verification tests, and business development.

## BIM Building Information Modeling

INGEROSEC is taking BIM approaches in cooperation with associated companies based in Europe. We aim to improve the quality and performance of buildings and infrastructure, whilst facilitating communication between project stakeholders, to increase the work efficiency.

## Community and Regional Development

On the principle of making people's lives more dignified, we provide consulting services to find, execute, monitor and review development projects. We draw up and suggest measures necessary for bringing the sustainable development to the society and the economy at the state level to the community level.

# Sustainable Development

**INGEROSEC plays a role in building a better society showing creativity, expertise and refined approaches gained from our wide experience.**
